

**READY TO LOSE
THAT STUBBORN
WEIGHT THAT
JUST WON'T
COME OFF?**

FDA APPROVED!!

Ages 21 and up only

ABOUT

WHAT IS SEMAGLUTIDE

Semaglutide is an injection of medication that when used with diet and exercise, can help you burn more fat. It will also help control your blood sugar, and, lower the risk of heart attacks and strokes. Studies are showing that **more than 1/3 of participants** receiving semaglutide **lost more than 20% of their weight.**

PROCESS

HOW IT WORKS

Our initial starting plan will go as follows; On the first visit, patients will see the doctor on site and will have lab work done. Blood will be drawn and sent to the lab. Once results are in, this will determine if the patient is a candidate for Semaglutide. Patients will then come in on a weekly basis to receive their shot and medical monitoring.

What is included?

DEXA BODY COMPOSITION SCAN

Dexa will be a full body scan that can provide your total body fat percentage (within 1% accuracy)

VITAMINS

We will provide you with a month's supply of a very high quality multivitamin for each month enrolled. This provides nutritional support while in the program. If any additional supplements are needed they can be ordered through PSM as well

EXERCISE AND DIET

We will have exercises created for you and will have diet tips as well. 2 sessions allotted per week to speak with staff and the doctor for free!
